

Climate Action

This is what we would like to see our community like. So all that we have to do for climate action in our community is to not litter, plant more trees, not cut down as many trees and to just take care of the community. We need to walk, cycle and scoot more and use less of our cars. We need more trams + trains. With climate action we want to reduce our carbon dioxide and help nature and biodiversity. good climate action.

Sustainability Development Goal:

13 Climate Action
