

Clean Water and Sanitation

The reason why we need clean water is because in some countries they don't have clean water and some countries they don't have toilets. Some people get sick from drinking dirty water. The dirty water goes in to the ocean and kills the fish and sharks.

Dirty water →

These people are sick from drinking dirty water. They don't have running water. They don't have proper toilets or sanitation.

flushing toilets

sinks

running taps

clean water

Dirty water

I should never drink dirty water

toilet bucket

Sustainability Development Goal:
